Winterization Procedures

Sterndrive Motor

- 1) Ensure proper operating condition and flush cooling system.
- 2) Run the engine sufficiently, bringing up to normal operating temperature allowing a portable gas tank filled with a mixture to circulate through the fuel system.
- 3) Drain water from engine block/fill internal water passage with anti-freeze containing a rust inhibitor.
- 4) Spray lubricant on all external engine parts to prevent against corrosion.
- 5) If the engine is a fresh water cooled system the anti-freeze will be inspected.

Inboard Motor

- 1) Ensure proper operating condition and flush cooling system.
- 2) Clean sea strainer and ensure removal of any debris.
- 3) Run anti-freeze through engine block and raw water engine components.
- 4) Spray lubricant on all external engine parts to prevent against corrosion.
- 5) If the engine is a fresh water cooled system the anti-freeze will be inspected.

Outboard Motor

- 1) Perform compression test.
- 2) Run engine to ensure proper operating condition and flush cooling system.
- 3) Run the engine sufficiently, bringing up to normal operating temperature allowing a portable gas tank filled with a mixture to circulate through the fuel system.
- 4) Grease all zerk fittings.
- 5) Drain and re-fill gear lube, reinstall drain screws and replace gaskets.
- 6) Spray lubricant on all external engine parts to prevent against corrosion.

Outdrive Service

- 1) Remove unit AND STORE INDOORS FOR WINTER
- 2) Inspect universal bearing, universal joints, bellows, shift shaft bushing, etc.
- 3) Drain and re-fill gear lube, reinstall drain screws and replace gaskets.
